

Testimonials/ Feedback to PacTec EPS Ltd

From Gene Wilson Group Technical Director

Augean PLC East Northants Resource Management Facility Stamford Road Kings Cliffe

“PacTec have been providing support to Augean specifically with packaging and disposal requirements for VLLW/LLW. Their help has been invaluable in explaining to the public, operators and regulators how in using the PacTec LiftPac system the waste can be safely transported, handled and disposed of meeting the needs and expectations of all. The support provided by PacTec gives us a high degree of confidence in the LiftPac system along with the quality of the technical and engineering support available. “

From Dorothy Gradden - Head of FGMSP

Sellafield Supply Chain Awards - SME Innovation Winner-Delighted to hear about your award. Well deserved. The support that you gave to the B29 team as we moved forward with retrievals was second to none and I look forward to continuing to work with yourselves on FGMSP

From Phil Hanson - Mechanical Engineer - Sort Segregate Consolidate & Condition Project

Excellent containers, the unit used on our project at SL performed perfectly. Will be using the same design again. PacTec help and advice was excellent. For decommissioning and waste removal, PacTec was the perfect choice.

From Thomas Hampson Sub-Project Manager

Dragon Waste Project & B241 Pump Module Project Solid Waste and E&EP Project Group

Great news. On behalf of the project, we can't thank you enough for your support and excellent help in getting us to this point.

From David Hutchinson Project Manager, Doosan Power Systems Ltd

Following a review of the radiological data, Doosan Power Systems undertook a transport risk assessment and decided that an IP-1 Certified "PacTec" overpack would be the best option for the safe transport of ten 7.5 Tonne Radioactively Contaminated Shield Doors from Berkeley to Gateshead. The Doors were to be decontaminated at Doosan Power Systems Active Waste Management Facility and Magnox required removal of the doors quickly from site to achieve a major milestone. PacTec responded very swiftly with a bespoke design and following agreement of the design PacTec manufactured the overpaks and delivered them directly to Berkeley allowing the removal of all 10 Items from Berkeley before the key date, therefore meeting the Key Magnox Milestone. Without PacTec's very professional and efficient response the Key Milestone would not have been met.

From Ms Jill Garner Environment, Safety and Health

PacTec - Many thanks once again for your help, support and fantastically quick service!

AWE Aldermaston

From Carly Carter MSc MCIPS Supply Chain Manager

Brilliant – thank you Liz – great service.

AWE PLC, Aldermaston

From David Sennewald ISIS Deputy Radioactive Waste Manager

Here's a few photos of the Ion exchange columns in the pactec bags.

They worked really well at both ends (RAL and Veolia).
